In just a few words each, name UP TO FIVE things you value most about Kendall?

-Small community
-Open land
-No housing developments
-Great school system with small class sizes
- people know each other

peace
nature
scenery
farms
sunsets

Kendall is a nice rural community that supports its members in many ways.

School district, low crime, ag community

Great bike riding, wonderful sunrises and sunsets, dark skies, nice neighbors, the small town feel!

Location. Neighborhood. Urban life Low crime rate. High way department response to seasonal conditions and individual needs.

1) Proximity to beautiful Lake Ontario and all it offers, 2) access to world class medical facilities and doctors at UofR and RRH for routine medical needs and surgery - but also greatly appreciate our local medical practice (Kendall Medical and Dr. Gaden). 3) Moderate weather in the summer and limited extreme weather , i.e. Tornados, wild fires, etc. 4) Small town feel, 5) Reasonable home/property purchase prices vs larger municipalities

Privacy, lack of dense population, multi-generational family ties, hunting and fishing opportunities, self-sufficient attitudes.

Beauty, quiet

Small Town Atmosphere; Lake Front Community

Farmland - Great schools - open country- responsive town - new sewers (investing in infrastructure for the future)

the Lake
Sandy Creek
the Canal
farmlands and wildlife

Rural
Tight community
Great schools
Beautiful area
Farmland

Quiet Surroundings, Friendly People, Beautiful Lake Scenery, Plentiful Farmland

Quiet retirement, good schools, rural, not urban.

Water front, country life, peaceful, great neighbors and community

Schools
Rural zoning and freedoms
Community
The lack of development
Quality highway department
Kendall buisnesses- farms , millworks, entrapuers and contractor

less rules and regulations than most places, nice rural character, good school district, small community, agriculture prominent

Small
Quiet
Nature
Farms
Safe

School tax. Town tax. Acting like a progressive town, taking care of business. Developing properties. Fixing monroe orleans county line rd.

Lakefront. Small community. Friendly

Rural, quiet, small town, good schools, peaceful

Quiet town
The abundance of land around
Friendly people

the people, quietness

Rural
Farming
Church
School
Carnival

Community.
Privacy.
Freedom.

Community, safety, rural, farming/agriculture & school district.

Quiet Community, Good Schools

Access to Lake Ontario
Active farmland
Small town feel
Local businesses
Location compared to larger towns

Rural community
No solar farms
Walkable community

People willing to help others
Respect for others and their values.
Strong School System

Freedom to do our own thing, open spaces, low level of regulation, quiet and peaceful surroundings, good and small school system.

I love the small town feel
I really value the peace and serenity I see when I wake up in the morning
The town, for the mostpart, leave's you alone and lets you be yourself
The people I encounter when I'm in town.
I have a good feeling if things got bad most everyone would pull together to make this town a safe place to live.

Community, rural lifestyle

Rural in nature
Family focus
Kendall School District
Kendall Lions Club
Lake Ontario

The space and the beauty.

Rural, nature, farm noise versus city noise, peaceful.

schools, rural, people.

The quiet, rural feel that it gives the second you enter Kendall.

quiet

- 1) Returning back to the country and small community.
 - 2) The bond and relationships new and old with other members of the community.
 - 3) The town board's commitment to not allow our peaceful waterfront neighborhoods be exploited for commercial gains like short term rentals (STR).
-

Peace and Quiet
Great neighbors
Sense of community
Kids can have a home
No short term rentals

Small town life
Everyone knows everyone
Opportunities for success
Caring community
School

Community, lots of support, everyone willing to help

Quiet
Rural
Friendly
Near the lake
In Orleans county

Rural, farm, family, not commercialized, nature

Quiet, safe, friendly town.

1. It has a small town feel with great people rooted in good values.
 2. Good proximity to larger areas like Greece, Rochester, Batavia, Buffalo with easy access.
 3. Waterfront is reserved for residences, not commercial or agriculture with public access via Hamlin Beach State Park and the new park built a few years ago.
-

quite rural living
reasonable cost of living

Warm, generous community spirit
Care and concern for neighbors

Community
Safety
Family
Agriculture

Rustic, Quiet, Visually pleasing, Private, Spacious.

Quiet, community driven

Living on Lake Ontario, living in a quiet rural area, small community, nearby access to fresh fruit and vegetable markets, friendly neighbors

Quiet most of the time

Hands off town government

Safe

Good infrastructure

Far enough away from urban areas

The school system-the teachers and administrators really care about the children and their future.

The community-friendly and safe and the town genuinely cares about keeping the town that way.

The location--love being out in the country without dusk to dawn light pollution and the quiet.

Quiet and peaceful

Friendliness of community

Active community: volunteering, public service

Lake life

Local agriculture: farm stands where you leave you money on honor system!

Low property taxes, community outreach, expansion of water/sewers, bring in more businesses / more money for the community

Rural, community

Small town feeling

Unique crop fields

Its clean, no large areas of litter or yuck

Near the water

No big commercial stores

Quiet, no crime, peaceful people,

Safety

Privacy

Community, freedom, quiet

open space without neighbors on top of each other

no section 8 housing that breeds crime

people let other people live (no karens)

Small town feel but got it all

Friendly

Welcoming

What opportunities exist that would protect and/or enhance the values listed in question 5?

-Protect our small town from encroachment of housing

avoid the destruction of Kendall's beauty, promote the hard work of farmers

modernize infrastructure

Opportunities include volunteering with the fire department, schools and churches.

Incentives for ag producers and small businesses

Electing wise, innovative leaders is number one. Making sure that committee members are knowledgeable about best/exciting practices used in other places. Some common sense: if being able to bike, walk or run is important to the Town then all roads must be designed or resurfaced recognizing that as a priority. Dark skies mean that neighbors need to use sensible outside lighting only when essential. And that lighting needs to be targeted on their property and low enough so it doesn't impact others enjoyment of watching the stars. Code could do its part in making certain that lighting is done correctly everywhere.

1) Find a way to get the overall tax burden down, Drive competition in gas station ownership. Crosby's has an iron grip on Kendall and the rest of Orleans County. Kendall gas prices are often the highest in WNY.

Combination of wooded and open land, and public access to our lake front.

NA

I would like to see more small businesses such as a few more restaurants and shops but do realize this may not be possible due to the town's population. The Dollar General was a wonderful addition and desperately needed.

Protect farms

more and better jobs

planned housing growth

No solar farms or data centers

We need more affordable housing for families

While respecting the rights of large landowners and keeping an eye on affordability, incentivize agricultural landowners to keep their lands as croplands or pasture. When subdivisions or lots need to be created, try to limit or cluster new lots along hedgerows or forest boundaries rather than carving out 1-2 acre lots along a long stretch of road.

Farms are well established. Able to purchase fresh produce locally. We need better emergency medical access. Sewers are replacing septic systems.

Fewer people provide the quiet peaceful community, however the lack of population will make sustaining that peace less likely. Growth will need to happen for the survivability of Kendall.

Restricting development for commercial limiting so that there are no chains or franchises

- support local businesses and develop sole proprietary and or non chain businesses

stop solar and wind projects, quit adding to the codes, keep right to farm

Acting and living up to core values.

Continued communication. New homeowner welcome information including how to stay informed.

no more building, help keep our farm land

Do not build solar fields

Not sure

Continue to improve park areas along Lake Ontario

Consider bike trails to connect parks and other community locations

Farmland protection - possible purchase of development rights to protect farmland long term

Continue and add community activities

Encourage local businesses including more restaurants- incentives, zoning?

Sidewalk from Dollar General to 237, too many people walking on Rte 18 with 50 mph speed limit.
Not safe!

The Kendall School System with it's high academic standards brings people to Kendall who want to live here.

We don't lose ourselves to the standards, cockeyed values, and crazy visions young people have these days. Our town "works". If it works don't break it.

Ability to homestead

Love community events, such as the fireman's parade and carnival

Comprehensive planning/Local Waterfront Revitalization Planning/farm Protection — to allow a balance in maintaining Quality of Life affordability.

Crop rotational program and Conservation Easements.

Not really sure, but would like to keep it peaceful and natural.

Elections, farmer support, community events.

Not letting housing developments or solar farms take over the lands

For the town board to stand firm on their commitment to not allow our waterfront properties be exploited for commercial gains primarily not allowing any new short term rentals.

Keeping Bald Eagle a private Road for families and not opening the door to short term rentals

More opportunities for new home owners

Less rental properties

Small business growth

Town board open to new experiences

No solar, no data centers, no complexes, no wind farms

As the community grows and evolves it is important to maintain the rural culture and values that exists. This will be challenged if more people move into the area who want subconsciously to transplant the things they dislike about where they are moving from.

maintaining short term rental moratorium

consolidate the schools

Lions Club

Local Churches

Better Relationship of School and Family

Years ago if you worked at the School- Harlow Fisher Days you bleed Kendall. Now its rare to see Admin, teachers or staff other than Mr. Watson, at school functions unless it is a relative of theirs. They have a motto of One School, One Community, One Family- this is so far from what goes on.

Open spaces

Town & school functions/clubs

Maintaining clean water in the Great lakes, protection from shoreline erosion if current situation changes, limiting development that would make the community feel crowded or overly busy.

Renting should be severely restricted in lake shore communities, if you own property on lakefront it should be for your families enjoyment, not rented for profit. Results in issues relating to my enjoyment of my property.

Require motion lighting instead of dusk to dawn lighting. When I first moved out here, the night sky was amazing, now people have these lights on all night long and the stars are harder to see.

Zoning to ensure we balance our quiet lives with opportunity to bring in business. I wouldn't want to see us turn into a "mini" Brockport or Greece. Recognize business will help ensure families want to

move to Kendall. I see opportunities for tourism by the lake/marina, open spaces for community use (ie: Curtis Park) and helping the "downtown" area spruce up and small business move in anchored by The Grove 1848.

Not sure to be honest

All utilities to residents in district

Small town feeling = terrible road conditions in the winter. I would love to see plows hit the pavement and to actually use salt instead of all sand.

Nor sure what you're asking

Unified values of residents

Teaching children in our schools the values of civility, decency, respect.

Lack of regulation, individuals first, community events

zoning laws and town laws.

Something has to be done regarding property taxes for the elderly. While the STAR program is a great help, something more has to be done regarding property taxes. Assessments keep increasing as do tax rates.

Keeping everyone in the loop as you are doing

Name UP TO FIVE local issues impacting Kendall:

Water

noisy establishments

gas for power needs to be accessible

modern sewer lines needed

There are still areas without public water and solar farms taking farm land.

High taxes, high utilities, lack of incentives and support for farms and small businesses

lake water quality, 1000s of dead ashes just waiting to burn (this scares me), retention of youth, lack of exciting opportunities for employment, lack of a great library!

1) Huge concern with lack of rapid emergency response. Honestly concerned that I and my family may be one emergency away from death.

2) Lack of good paying jobs in the community

3) High Taxes... property taxes likely driven by the number of farm properties, school taxes, gas taxes likely driven but the lack of competition of gas station providers and orleans county taxes. There are many farmers that purchase large plots of land with a home... they sell off the home with an acre of property and turn the rest of the property into agricultural land - putting an even larger burden of the tax base.

3) Lack of political party diversification leading to the same thinking year after year.

4) Very hard to find qualified / reasonable local trades... home improvement, plumbing, etc.

Soaring utility costs, onerous regulations as to private property,

Pollution from roundup and runoff from fertilizer into Lake Ontario

Sorry, I cannot think of any

lack of jobs to retain population (especially youth)

need to develop green power alternatives

No available, affordable housing for families wanting to send their children to kendall schools

Rising property values and taxes; affordability

Limited choice and high costs of reliable Internet service

Too much money spent on school expansion, when the student population is half what it was when we moved here. 1200- less than 700. This tax money should be spent providing the school and the community with a swimming pool.

Taxes, infrastructure, growing a "downtown" to draw outside interests to create larger tax base, preserving our heritage in farming.

-public water on some roads

-restrictive zoning

some residents need water, budget needs to be frozen or reduced because the constant raising of taxes is creating hardship

Not enough rental properties

Need one apartment complex to increase numbers.

House prices

Tax increases

So much farm land, nothing for people to buy or build on.

School taxes and transparency.

Taxes. A village that should continue to grow as we grow. Farmland use as farmland maintained (all things the plan committee is most likely working on)

Drainage from fields with more thought of culvert locations around residential homes to help prevent flooding would be helpful for future and existing homes.

Community water supply for all residential homes. A large # of residents still do not have access to public water and have to haul their own water for dried up wells or poor water quality.

I'm not sure this is impacting Kendall, but I hope solar fields will not find their way in. I support ways to obtain energy but in that way.

Lack of housing, town must take over roads behind Crosby's.

Decreasing school population

Need more social activities for those retired

Tax assessments. Flooding from lack of upkeep on the creeks.

Airbnbs, Lake Ontario water levels, road maintenance

High water in Lake Ontario

Limited businesses

Limited outdoor recreation

Not enough sidewalks to businesses and schools.

Lack of Housing

Lack of Small Businesses: Laundromats, Hair Stylists, Car Washes.

Lack of listening to the people that are impacted by decisions that the council is making.

money

new people moving in thinking they have better ideas for this town than we have. They don't know this town.

Solar "farms"

Housing available for younger people

1) Reduced TOK Population

2) Reduced School KCSD enrollment

3) Reduced Orleans County Population

4) Housing Shortage

5) 47 % of Orleans County land mass in Agriculture production (Ag District #1)

Sorry, don't really know.

Solar Farms, lakefront usage, old Morton fire district.

There are a large number of residential properties throughout the community that have extreme amount of junk and garbage around the resident which makes the community look bad. For many people looking to relocate to our neighborhood with their families, this could be a huge deterrent.

Agriculture

Potential infiltration of short term rentals

Same as #6

High taxes, solar power taking away from farms

Lake pollution mostly due to agricultural runoff, pet waste, malfunctioning septic systems etc. High property taxes

High taxes

Lack of government transparency

Constant reassessments

Keeping owner occupied and farms present

Not enough options for shopping/ dining, recreation.

1. There is no noise ordinance law,

2. Short-term rentals are in a good place now with permits, but if reversed could lead to more permanent residents being replaced thus hurting the culture of the community and creating a housing shortage and price increases.

sewers

water districts

extending sidewalk at 237 and 18

Declining population

Administration in Schools

No Land Left to Buy

No room for new families to move in

School numbers (student population) dropping

Windmills, Solar farms

Flooding from creeks and farms (via culverts) - the runoff is also detrimental to wildlife and the habitat

Not enough diversity

Speed limits too high when in more neighborhood- like areas of main roads

Pesticides used that kill pollinators

Lack of adult community education, lack of restaurants/bakeries, some dilapidated buildings and junky yards

No more EMT support

Flooding from Parkway

Need more oversight of building permits, a lot of people don't even get them for major improvements or remodeling. Including making drainage "improvements" without consulting neighbors or building inspector.

Light pollution (State is trying to pass code) People leave bright outdoor lights on all night.

Renters up by the lake not always being considerate of the year round residents by letting their dogs run out of the yards and being very noisy late at night.

1) More housing and make it affordable

2) Jobs in the surrounding area

3) Roadways (especially Rt 18 and County Line Rd) need major repairs to make them easier to travel without damaging one's vehicle. If you work in Rochester, Brockport or Albion roads will impact where you buy a home.

4) Better maintenance of the Lake Ontario Parkway. Partially rehabbed in 2019 and already its being left to fall apart again. Plan for west of Kendall towards Point Breeze...terrible!

5) Water for the entire town. With climate change we can't have residents relying on wells for water. Overall, for Kendall to be an attractive community, we need to have better infrastructure.

Water access

Water

Assessment

Winter road conditions 100%%%

Not accessible sport fields.

No school zone for speed control in front of the MSHS

Public water, access to natural gas

Incompetent people holding town and school board positions

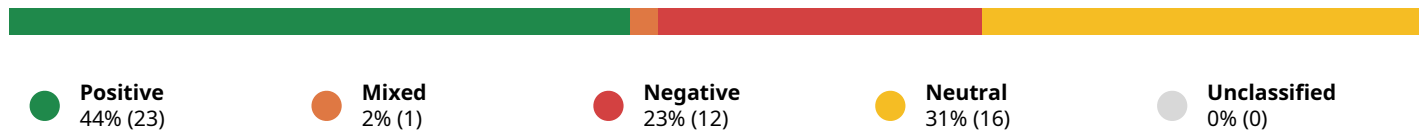

population increase will eventually force a waste treatment system

State STAR program coupled with Town STAR program help let residents afford to stay in their homes

8. What do you think the community and/or local government can do to address these issues?

What do you think the community and/or local government can do to address these issues?

besides this survey, I don't know of any way that government elicits are opinions, make it more accessible.

Keep working on water districts and limit solar.

Provide incentives for farms and small businesses

1. Develop a strategy that better balances farm properties and regular taxed property that reduces that tax burden of the Kendall residential property owners. Each year more and more of the burden of taxes falls to homeowners.

2. Drive competition to lower gas station providers and lobby Orleans County Government to lower gas taxes.

3. Continue to pursue NYS and Federal Grants to improve utilities and other services.

4) Perhaps the high school could do internships or training for vocational trades (i.e. plumbing, home improvement, etc) to help grow these skills and availability in the community.

Repeal regulations and code which inhibit the ability of people to be self-sufficient and create at home side income.

Pass legislation to regulate these toxins more closely

Try to attract business--manufacturing or other

Encourage property owners to fix abandoned houses build more rentals

Keep the absolute rise in property taxes in line with local income growth. If incomes only are rising by 2% nobody wants to get socked with a 6% tax increase.

Re-think where our tax dollars are spent.

Need to get sewers to Main Street Kendall to allow for more business growth and eventually more housing choices.

Increase tourism access

Invest in expanding public water access

tighten budgets, communicate better and not make decisions before getting feedback, listen to residents.

Give farmers incentive to sell for an apartment complex.

Help give tax breaks to residents.

Not allow solar fields on farm land.

Acting on issues in a timely manner

The planning board doing things like this. Door to door may be needed. Volunteers maybe with training sessions. Also a large meeting like the one done at the beginning of the sewer project as a "kickoff".

Be more aware of potential and existing flooding hot spots and while improving the roads relocate culverts that add to those areas.

Address the public water supply so all Kendall residents have access to public water.

Lack of housing, town must take over roads behind Crosby's.

Stay out of it - less governance over people's day to day lives.

Do not overdue tax assessment and take into consideration the conditions of the homes rather than the going price. Cleanup of Yanty and Sandy Creek to help mitigate flood issues.

Ban Airbnbs, fix roads

Encourage lower water levels on joint commission
Continue to improve park areas along Lake Ontario
Consider bike trails to connect parks and other community locations
Farmland protection - possible purchase of development rights to protect farmland long term
Continue and add community activities
Encourage local businesses including more restaurants- incentives, zoning?

As was scheduled when Dollar General was built, they installed sidewalk in front of property but not connected to any sidewalk forcing people to walk on roadway.

Provide more infrastructure such as water and sewers.

Find developers to develop affordable housing.

Listen to the constituents about what we want rather than telling us what we want.

Don't let anyone try to change this town's policies, rules, and ordinances that hasn't lived here at least 7 years.

Zone against solar "farms"

Quality Comprehensive Planning/Action

Same as 7

Support republican legislators in Albany to stop usage of tax dollars to subsidize solar companies, residents of Kendall should be in Kendall fire district not Hamlin.

Not sure if they're already is a junk ordinance and it's not being enforced or there is not one place. If there is an ordinance, it needs to be enforced or if there is not one one needs to be put in place and enforced.. We have a wonderful community, but we have some properties that are really making it look bad.

Keep the houses on lakeshore as family homes not STRs!

Approve small businesses

Stop increasing home assessments

Crack down on the same people buying up houses to rent instead of properties becoming available for purchase

Provide programs to make the community more aware of their effect on the lake.

Elect people that are fiscally conservative

Loosen restrictions and zoning to allow businesses to move in easier. Having a nice park would help.

1. Implement a noise ordinance so officials can address noise complaints as they arise.

2. Do not reverse the STR policy. Understand the underlying motivations of people who will push for this. They are not aligned with the greater community. Also, realize people who rent an STR are not spending an impactful amount of money in the area. They shop before they arrive, they most likely want to enjoy the house versus going to one of a few restaurants, and any shopping they do will be minimal.

3. Ensure code enforcement proactively enforces the appropriate codes versus waiting for complaints.

sewers seem to be on schedule

water district 11 was pending government funds

sidewalk would require engineering and funding

Provide more opportunities for families

Expanded coverage of water lines and high speed internet

You can't. Your children get punished if you speak up. Huge issues and getting worse and worse.

A perfect example of not being one community, one school would be they did their strategic plan at

the same time as this. People are going to have a hard time deciphering between the two for surveys. There is a big lack of communication between the two.

Keep them off the voting table

Study where culverts can be moved to help residences with flooding issues.

Reduce speed limits anywhere there are at least 5-10 residences within a half mile.

Preserve certain areas for pollinators along roadways. Encourage farmers to Partner with Conservation Programs

- Work with groups like the USDA Natural Resources Conservation Service
-

Provide community education, encourage new businesses (but not too many), enforce codes.

Do drive by's to see if remodeling work has required permits. shouldn't be neighbors responsibility.

Fine those that let that happen or fine the owners of the cottages as well.

Grants/funding for road maintenance as well as water infrastructure.

Local developers could be brought in for discussions on their thoughts on how to build more housing.

Work with County on attracting independent owned businesses to the Town.

Obtain government grants to expand quicker

More community input not just a few deciding for the masses

Fix it

Even if that's increasing taxes. Safety of the community should be valued more than it is. That includes roads and accessibility

Expand the water and gas supply

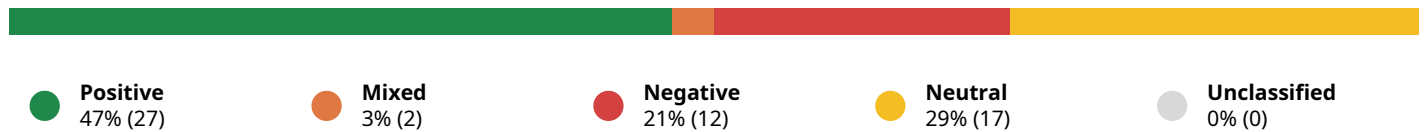

Share what's going on in the town with residents. More sharing and education to residents to better understand issues, ways to help, ways to volunteer, serve. Very little public information. Town website not great.

Freeze property taxes for the elderly. Many live on Social Security only. Pick a year where the property tax is frozen (65, 70...) Without something being done, the Town is forcing the elderly out.

9. In one sentence, how do you see or envision Kendall in the next 8-10 years?

In one sentence, how do you see or envision Kendall in the next 8-10 years?

I hope to see it continue to be a small community where kids can grow up feeling safe surrounded by supportive neighbors

I see Kendall as stagnant without growth of population unless gas and sewer lines are offered.

We would like to see Kendall maintain its small town and tight knit community atmosphere.

Still rural, possibly fighting to maintain that character because of an influx of people come from other states that are becoming uninhabitable.

Similar to the way it is today with more sewer and water districts.

Unless Kendall dramatically changes it's industry base away from farming to higher paying/tax contributing industries I cant see how things will be different in the short or long term

We hope very much to see the next generation stay here, in privately owned homes, to raise their children. I hope there are NOT major changes to our landscape, and certainly no "affordable housing" compromises.

Corporatizing farmland and and areas

Hard to say, but likely slight increase in population, possibly a few more businesses that may attract more people to move to the town.

Growing responsibly and cleanly

I love the small town and it has so much to offer, I know farming is hard and unpredictable , I hate to see farms being bought by big corporations

Pretty much the same with a bit more growth/ encroachment of suburban style housing, eating up the croplands.

More recreational opportunities provided for senior citizens, besides being permitted to walk the halls in the elementary school.

Expanding the footprint on main street Kendall to allow for commercial growth and different housing choices.

Hopefully it doesnt change much it is pretty great the way it is

Keeping its rural agricultural character and small town appeal....

I worry that it will be full of solar fields and not food.

The school will continue to struggle in size due to not every family being ready to purchase a home.

Deleting the community

I would love to see all future village buildings designed purposely to look like an old time village that has always been here

Hopefully the same quiet rural community it has been with improved public utilities.

I hope farm land, woods. Maybe a business or two on the beach. I think kendall could use more housing. I see a lot of people looking but hard to find one available. Older population has no where to downsize.

hopefully the same small town

I'd like to see Kendall grow but not so much that the charm and country community aspects are removed.

I hope it is exactly the same.

Pretty much the same as it is now

Kendall will continue to have a strong agricultural base with additional housing located near current centers of development (Kendall, West Kendall, etc.), a slight expansion of small, local businesses, and the start of a non-vehicular trail system connecting key areas of the town.

Not much change, would like to see area around town hall, Post Office, Fire Department and The Grove cleaned up as buildings are in disrepair.

Expansion from the eastern communities: Greece, Hilton, Hamlin, as more people want to work from their homes wanting a good school system, safe community, and a price value relationship between costs and incomes.

Similar to how it is now. Not looking for major changes, which is one of the appeals. No desire to see if significantly grow in size.

I don't feel good about it. I feel like people are going to walk in and change this beautiful town into some cockeyed type Pittsford town.

It will continue to support a rural lifestyle that is safe for families to learn and grow..

With Proper comprehensive planning and engagement with both the private and government sectors - can avoid unaffordable future tax rates.

Keep it agricultural.

People are leaving NYS, western NY, and Orleans county; Kendall will be affected.

I HOPE that it doesn't become congested with neighborhoods and solar farms. I envision Kendall keeping the small town, small.

hope it stays the same

Would like to see in the coming years as opportunities arise, more available land for new homes to be built, therefore bringing in more families to support the schools and the community. Thank.

Quiet and peaceful

Unless something changes, the same people with wealth will continue to become wealthier and there won't be opportunities for new families to find a home in Kendall.

People not affording and moving

I'd like it to remain a sleepy agricultural town

Hopefully, very much the same

I'd imagine it's going to be the same boring town. I like it small and quiet, but even Holley has small amount of business in the town square. Kendall used to have much more.

The community will evolve as the longer-term residents depart the area for various reasons and are replaced by a combination of people returning to the area and new entrants. As the impacts of climate and macro-forces put increasing pressure on agriculture there will be temptation to convert some land to commercial, residential or wind/solar facilities. Urban sprawl will continue. Kendall is a hidden gem and people know this. We need to protect our community, culture and values without hindering progress.

Hopefully very much the same as it is now

If we don't do anything to attract more families, we will continue to shrink.

If this administration stays in the schools, the population will decrease more as families continue to move away, if we can revamp administration, then I can foresee the population increasing and Kendall being a tight knit community.

Non commercialized *Pro farm family residence country living

Still quiet. More diversity. More environmentally sound while productive for farmers, more community programs/areas - maybe a pool and pickleball on the town hall property

I would like to see a bit more development to provide activities and restaurants while maintaining a small town feel.

About the same, with improvements of the issues noted.

A safe, family friendly warm community.

A thriving community that attracts families and retirees alike, where children and grandchildren enjoy the outdoors learning to be good stewards of Lake Ontario and how local farmers bring fresh healthy food to Kendall.

The same. No new apartment builds or housing tracks. Thats why we like it too

The same as it is today.

I see it as decreasing in population and many of the houses falling into disrepair.

I would hope this is not the future but hard for me to see otherwise.

Much the same

At the rate its going, Kendall will become another bedroom community, just like Hamlin.

Growing in agriculture .

Expanding water system

Natural gas expansion farther out of village.

What do you think is needed to make Kendall what you envision in the next 8-10 years?

-Don't fix what isn't broke

Projects to accomplish that

To have local government keep this as their goal.

Good protective, thoughtful laws and code. And an excellent school system!

Seems individual utility districts is what it will take to keep overall taxes lower or steady yet still provide the services. These services increase property value and perhaps generate more interest in the Kendall community. Continued pursuit of NYS and Federal grants is greatly appreciated to get Bond Funding and homeowner burden down.

Leadership within the town must push back against the State's interference, and the local boards' seeking ill-fated gains in the pursuit of changes for changes' sakes.

Less regulation

I like Kendall the way it is. A small town that is also smart enough to be looking to the future to protect what we have.

Careful wise planning

I really don't want to see Kendall swallowed up by suburban/exurban sprawl and turn into Parma.

A pool, a variety of classes for senior citizens including exercise classes and ballroom dance instruction.

Infrastructure; sewers, new side walks and curb appeal.

Maintain consistency and don't turn Kendall into the suburbs

Limit or ban wind/solar projects from eating up land, prioritize the right to farm both small and large

One apartment complex in town utilizing small area of farm field, maybe some more sidewalks and a slower speed limit on Roosevelt Hwy.

A vision and action from the board.

I haven't lived here long enough to know. I am actually very happy with the status quo. I don't know if there is a need for any of my answers

People! People need to stop complaining and get involved.

Bring in younger families with children.

Keep everything as is. Do not make new developments or add in apartments or low income housing, or solar farms, etc. It is perfect.

Encourage lower water levels on joint commission

Continue to improve park areas along Lake Ontario

Consider bike trails to connect parks and other community locations

Farmland protection - possible purchase of development rights to protect farmland long term

Continue and add community activities

Encourage local businesses including more restaurants- incentives, zoning?

Continued strong schools would attract new residents

Some type of code or project to improve area and possible business development.

Moe grant funding from the Federal Government and N.Y. State. It is based upon income when it should be based upon needs to the community versus how much you make.

Continued maintenance of the current systems.

People to not stand up to the ones trying to change us and stop the nonsense.

Fight against stupid state mandates that don't understand our lifestyle and protect our agricultural spaces.

Community connections (Get in the room) with all stakeholders.

Don't know

To stop the migration south, NY city would have to turn RED.

Laws put into place that stop people from developing neighborhoods and solar farms .

Keep people in check on the board who want to reverse the recent laws regarding STRS

Fresh perspectives

Loosen zoning regulatory restrictions. Maybe help find state grant money to bring some small mom and pop shops into town.

Understand why people value living here, recognize it is only a 20 to 30 minute drive to get any amenities needed so they don't need to be in the heart of the community. Encourage people who want to change the values based culture that anchors the community and its residents to relocate to the area that best supports their individual desires versus changing the fabric that impacts the wider community to satisfy their individual desires.

individuals realizing that they alone are not the center of the universe

See above

People to not have fear to speak up.

Keep commercialized windmills, and solar farms out of our community

Enough interest/information/education as to the health and benefits of each item I listed

Seems like some residents could step up and share their talents to promote more activities or maybe link up with the school or other communities, Encouraging new businesses to start up or move in, whatever that entails, would also help.

Town officials stepping up to the plate.

Continue with what has been working all along, people that care deeply about the community in positions to keep it that way.

What I've stated above, you need good infrastructure, affordable housing and opportunities to shop local or at least close by to make Kendall attractive to anyone looking to move here.

Nothing

Ways to not make that happen - teach children in school about entrepreneurship / lean businesses / manufacturing. Get business classes in school. Have them go on business trips. Not just trips to any boring local businesses but exciting businesses that make people want to start businesses and employ people.

Leave people alone, we have a wonderful community that doesn't need more oversight or more taxes.

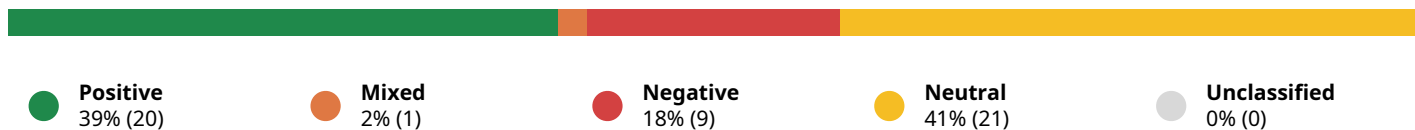

Hopefully there is something to be done to keep Kendall as a close knit, small town community that it is.

Are there any certain types of NON-RESIDENTIAL growth you'd support, or feel is needed in Town? Identify up to five different types (can be general or specific). You can also note if no growth is desired.

No growth desired

More local businesses are needed. Keep the spending in Kendall rather than residents travelling to Brockport or Albion.

We really don't need much non-residential growth, but I would like to see an Aldi store.

No growth unless it is farm stores or craft related. Also, it always made sense to me that the old Salvation Army caamp would be used by businesses leading in the development of wind, solar and water enegy renewables.

Anything that will reduce the amount of property currently consumed by low tax paying / low employment farms. Until and unless this happens nothing changes. Luring in a flagship industry (not a data center) could dramatically change the landscape contributing to jobs, tax contributions and future community growth.

Natural gas expansion would help.

Private business growth would be positive, such as a veterinary office, hair salon, or other services.

Ww need more opportunities to buy food locally. This area meets the official designation of a food desert.

Hardware type store, long drive to Brockport or Greece for these needs.

Diner would be nice, my apologies if there is a dinner I am missing. I understand an increase in population will be needed to drive this type of growth.

It would be lovely if there were more small stores.

jobs jobs jobs

The Dollar General is helpful. I'm not sure what else Kendall would support commercially beyond Dollar General and Crosby's and the couple of restaurants we have. It would be nice to have some walking/biking trails along some natural corridors, such as the railroad right of way, and along the parkway connecting the shoreline neighborhoods to each other.

See above comments.

Creating a desire to small town businesses on Main Street to bring a desire to be in Kendall. Start creating Kendall as the eastern gateway to orleans county.

Support local buisness and eutrapuers

-short term torusim rentals (allow them)

-sole proprietary business like the mill works and grove

-

No growth, there is adequate commercial opportunities very close to Kendall in all directions-Hamlin, Brockport, Holley, Albion. It would be nice to keep a local doctor where Dr. Gaden is now. There are no shortages of medical, grocery and shopping within minutes of Kendall.

Bringing a new dr to town, some added sidewalks/street lamps, slower speed limit of route 18, maybe one storefront.

Business

Any non residential done together. Village or lakefront done so convenient to go to one place and do several things. Example: lakefront- kayak rental, ice cream, swimming, restaurant, lodging (dream list but an example....) without impacting local residents....

I'm perfectly happy with the size of our community.

More sports fields for non school teams, example, travel baseball, travel soccer.

A simple restaurant would be convenient, one fast food chain.

Yes! Bring in SMALL businesses - shops, restaurants, attractions for families.

Farming and agriculture support to help support the local farming industry and prevent solar/wind farming from taking over.

No growth

Small retail shops

Restaurants

Possibly more water related business - scenic tours, boat rides/rentals

Pizza Shop

General Store

If we had cottage industry growth it would allow for population growth because it would be providing everyday necessities.

No growth is particularly desired.

This town could use a small cafe and a place for the kids to go after school that would have good activities to keep them occupied. Things like courses in "Living in the real world" and "Learning self esteem", and "Finding your values".

just a thought.

emergency Management (Fire and Ambulance) Volunteer incentives.

Downtown Renewal/Revitalization

policy to promote school enrollment increase (this is the largest employer and quality of life driver in the TOK

No growth is desired.

NO, keep Kendall a farming community. People living close to one another is the cause of trouble.

no growth

Would like to see some town funded programs to promote education that is required for more volunteer fireman and EMTs so we do not lose our local service to outside strangers.

No growth is desirable

More businesses and housing

Winery, brewery, cidery

Maybe another primary care doctor. Other than that no growth

The community can always benefit from 1 or 2 more restaurants. The 1.5 (Lures has very limited hours) are great and are busy.

Legal non-residential business not located in residential areas are fine with common sense exceptions such as pot dispensaries

Stores and businesses

Besides farming there is very few opportunities

Rec Facility

A restaurant or pizza place

Keeping mom and Pop type owned businesses within our community

See above - restaurant, coffee shop, bakery, class or activity facilities (eg. community center/access to school?)

Small businesses maybe.

Hiking/walking trails would be lovely

Business:

love to see nail or hair salon

more medical options

"One stop" farm market located in "downtown" area where one could get produce, eggs, etc sourced from all of our local farmers rather than having to drive to multiple stands.

No growth desired

Id be open to see ideas.

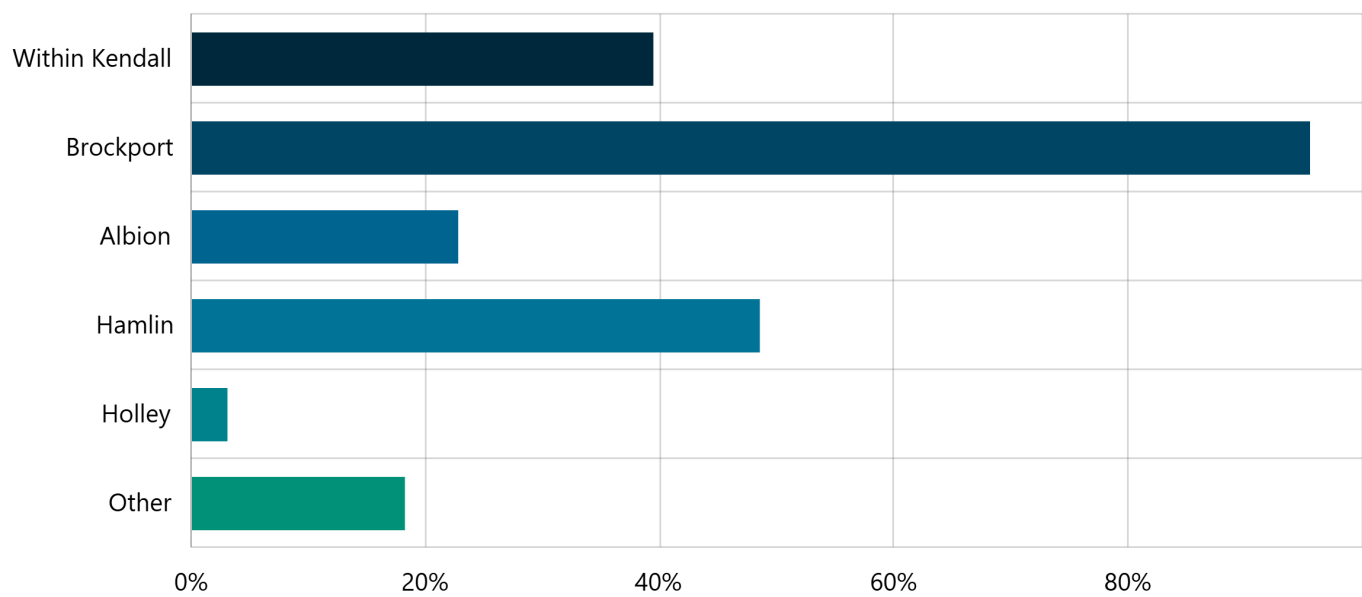

I love the small town that we have. I don't particularly think there needs to be any growth that doesn't happen organically. Maybe a coffee shop, restaurant, or a feed store?

DEFINATELY not Section 8 housing. Look what it did to Kent

None

What do you see as the biggest opportunity(ies) for collaboration between the Town and School District? For example, local business field trips, community garden on school grounds, volunteering, etc.

I think we do pretty well with this.

It would be great to have kids visit local business to see what's here.

Community garden would be a wonderful thing.

Interaction with the senior citizen's group.

no opinion

Continue or increase involvement between the town and school.

There is a disconnect between sports opportunities for kids through rec and the school district. Poor communication of opportunities, poor planning

Kids doing meaningful science-related projects: looking at water quality or keeping track of native flora or fauna, documenting areas of invasive species. The Town posing problems and letting kids come up with solutions. (Giving them the tools to do a great job) And then using the information or data gathered in meaningful ways.

Perhaps business focused internships during the school year that contribute to the Kendall community and grow student skills. Could also take the form of a trade or vocational school.

Mentoring opportunities with local entrepreneurs for students.

Not sure

local field trips

No opinion

Volunteering

the school should focus on academics and getting students educated and prepared for college....it would be nice to see reading/math scores much higher than they are now. More STEM courses and opportunities to partner with GCC or SUNY Brockport

Volunteers

Volunteering. Student volunteers on the planning board. Internships....

I'd love to see an outdoor classroom space.

I have no school age kids. I have no idea what is going on at school.

Local field trips showcasing our local farmers!

Community garden on school grounds with community members and students working together would be nice. Maybe even selling the produce to help support the schools.

The local business field trips, community garden on school grounds, and volunteering suggested are great ideas. Also, explore opportunities for high school internships with local businesses, encourage community participation at games, and other school events, and possibly partner with local businesses to provide good-grade incentives for students.

Community Garden

Cooperation between the School Superintendent and The Town Supervisor is excellent and is a must for continued growth of the Kendall Community.

No idea.

Community gardens to teach the kids everything from learning respect for nature, gardening for home and profit, the importance of working together as a community for the betterment of all.

Need Housing - enrollment decline cost per student concerning.

Must work with other Townships as the school districts is in two counties five townships

Stay out of the school system. We elect people for each board separately.

Volunteering

Internships

Whatever lowers taxes

Volunteering, would like to see a pool added for community use as well

I don't have kids in school, nor do I plan to send my son to public school, but it would be cool to see the greenhouse come back. My dad said that they grew vegetables for the school there.

Bring back volunteering in school districts (after being vetted of course)

Communication. There is no communication from school to community unless you are a parent and have the app.

I love the idea of a community garden that students could be involved with. A community garden on town property would be ideal. Students could have class walking trips there as a learning resource and earth stewardship. I would not be comfortable with just anyone visiting a garden on school grounds. Too difficult to monitor safely.

Adult community education and recreation.

A community garden is a great idea!

This is a difficult one. It comes down to if you have children that attend KCSD. If yes, you probably know everything that is going on within the District. If you don't then you're out of the loop. The District has a website, I believe I've heard there's Facebook group. If you don't engage in social media or think to go to their website that's not on the District.

First, I love that this is on here.

Accessible sports fields and updated Accessible stadium.

Field trips to business is a great idea. That also goes with the Eagle visions the school is working on. I'm pretty sure it's obvious who I am in this survey...haha and I would LOVE TO HELP WITH THIS!

Business trips

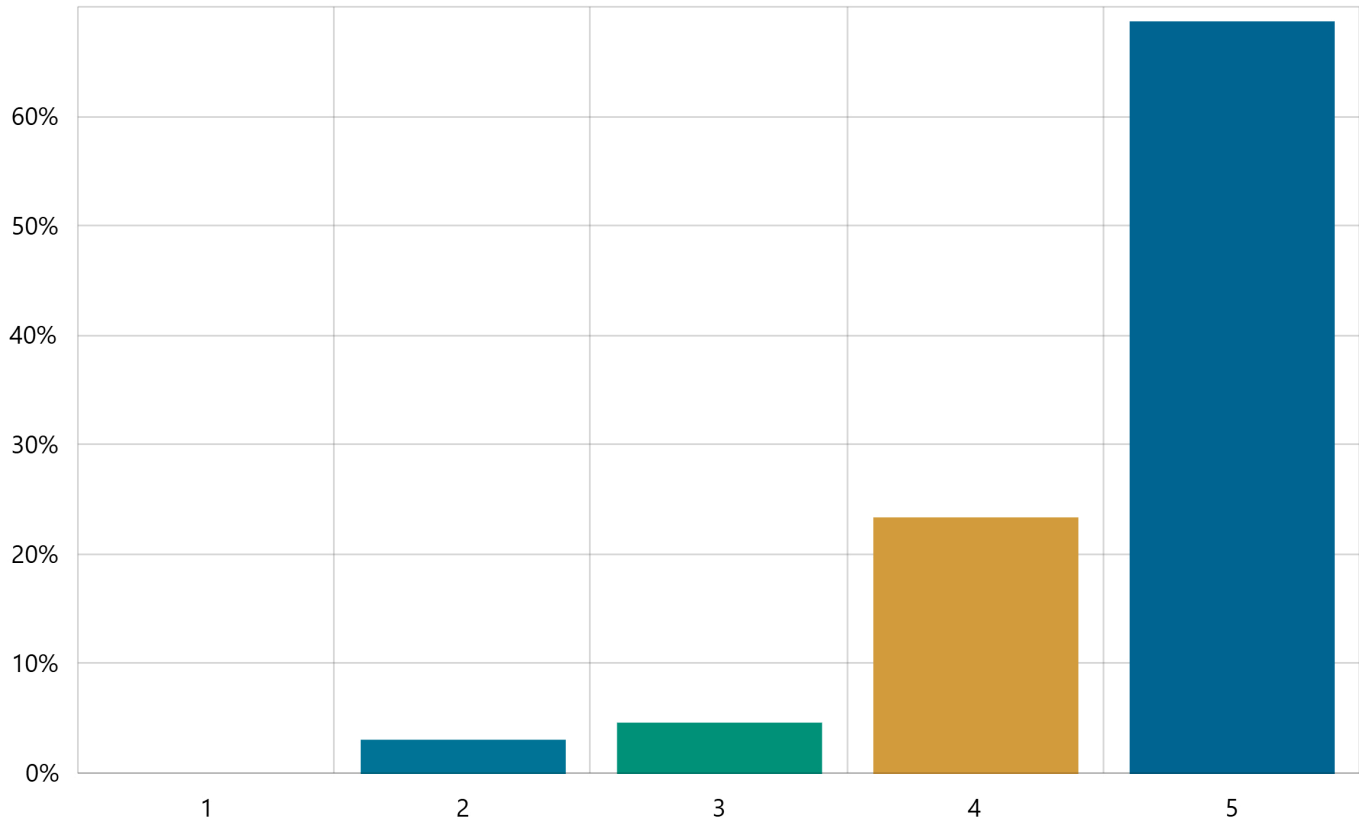

I feel the school district is too liberal for the rural town and collaboration will never be successful.

Aiding community like they did this winter.

There are a lot more opportunities if teachers/ administrators work with town leaders.

23. How high of a priority should the Town place on conserving open and working lands as part of the Comprehensive Plan?

Rating | Skipped: 2 | Answered: 64 (97%)

If you could change one thing in or about Kendall, what would it be? Please keep it local and related to Kendall - no one really likes State taxes!

access to sewer and gas

Get everyone public water!

More support for small businesses and focus on local agriculture like a town sponsored farmers market

There would be a wonderful, well-stocked library and community space that would appeal to almost everyone in the Town

Dedicated emergency medical services.

Democrats in local government positions along side of Republicans

I don't have any real complaints about Kendall the way it is now.

I would want school officials and other officials to listen to all sides in an altercation, not just to their friends. Be impartial. No favoritism.

Wish we could emulate Medina's appeal.

Freeze school budget as number of students is at an all time low (at least over 30 years) and manage flooding better....ditches cleaned etc.

More sidewalks, lines on road, wider shoulders on roads for safety.

Be real with assessment. Your assessment goes up your taxes go up.

A small village to "go to" or a lakefront area to "go to".

Winter road conditions within the town of Kendall.

Pool for the school or community splash pad. We have a pool at our house but otherwise the children of the community never receive swimming lessons or any kind of water exposure. I realize we have Hamlin Beach but if we had a school pool the students and community could use it year round.

More people involved

Upkeep of creeks to help mitigate flooding. The creeks have a lot of blockage.

Add recreation trails for bikes and walker/runners

Safer walking areas, roadways

Having more land for developers to purchase and develop housing which is the back bone for continued growth in Kendall.

Better communication about issues under consideration - unless you know the right people, no idea what is going on!

Go through all the ordinance and get rid of the garbage and restrictions that hurts this town. There are many things in them that just makes living here uncomfortable. Example: We don't need an ordinance concerning camping on our land that "back in the day Murray had a problem with people leaving the city and setting up camps along Ridge Rd.. When someone show someone in Kendall that ordinance the Kendall board member that it was cool so the changed the name and a few words and voted it in". That camping set of rules have hurt families and made people not want to make this their hometown.

NY

Housing

Maybe another store.

I would fight to get the tax dollars being collected from Kendall residents in the old Morton fire district kept in Kendall. Our closes fire dept is Kendall.

In sharing that there are enough volunteers for our fire department and EMTs and anything that town can do to help with their education cost.

Nothing

Availability of homes for purchase - not rental properties

I'm from a farming family and I have nothing but respect for the farms, but I love to see some wooded public land access. We have zero of that. I'd like space to roam. I know this is likely not to happen, that's not Kendall, it's just a dream. I don't know if there is a way for the town to acquire some wooded land that goes for sale and turn it into a public space?

Not necessarily a change, keep the current STR policy in place or remove them altogether from the community. STRs do nothing to benefit the community and culture of the community. It would be better for the community if families lived in those houses. They would spend money year-round versus during the seasonal periods, potentially enroll more children into the school and participate in community activities. People who rent an STR do so to stay at the property, they shop before they arrive and do not venture into the community in the same manner a resident would.

consolidate the schools so as to lower school taxes

More family friendly activities

Hiking trails, ice skating rink, water front accessibility, etc

School Administration and their knowledge of what our community truly is.

Being able to utilize one's property truly as a farming or ranching capacity.

Access to a few more activities/businesses.

keep the small town rural character

Have a pool at the school, we are so close to the lake I feel that it is imperative that the kids learn to swim.

The "us/them" feeling between Rural and Lake residents. We're all ONE Kendall in my opinion!

Not much. We moved here from a very busy and congested town. We absolutely love all the feels of Kendall and what it offers.

No more renewable energy sites. A colossal waste of resources.

No low income housing

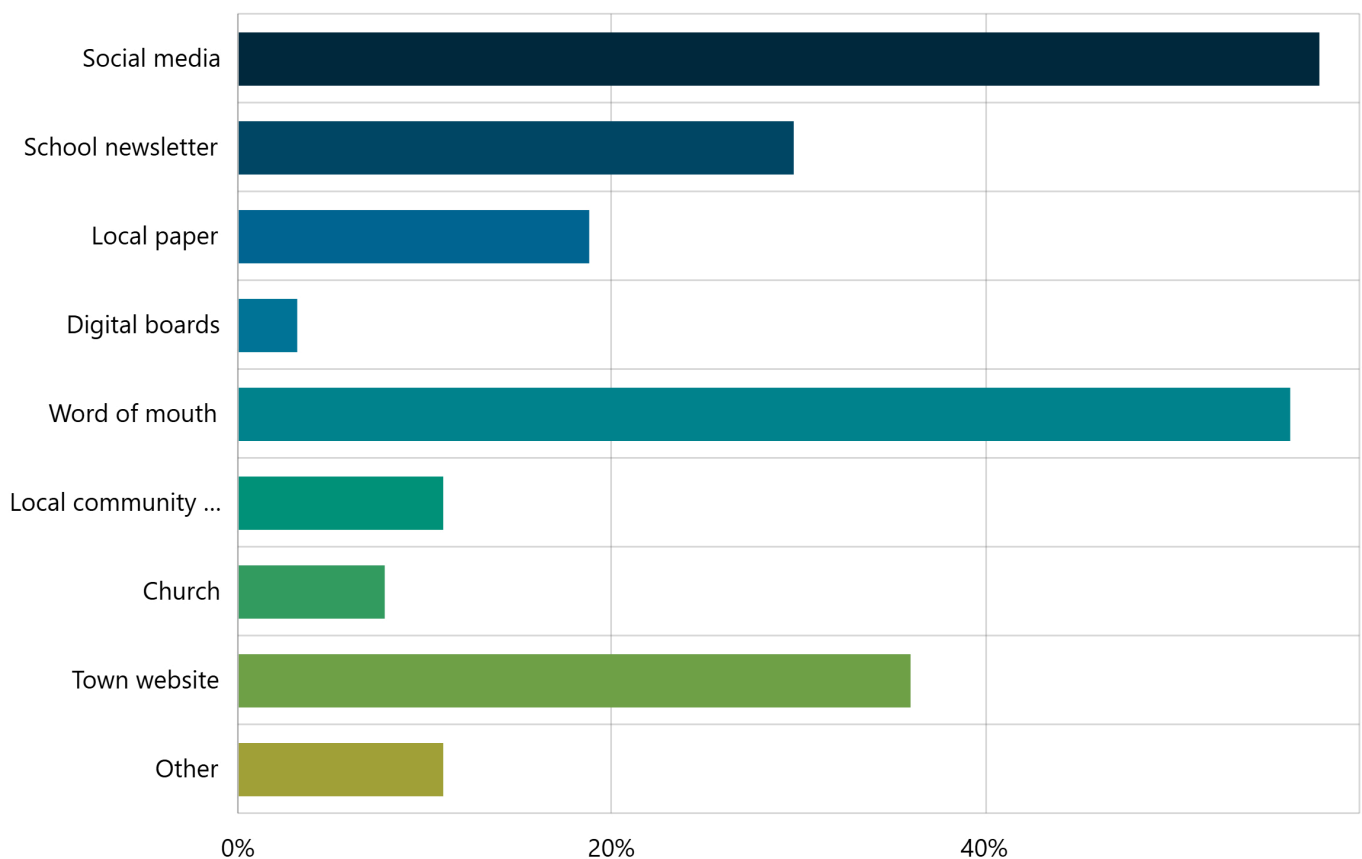

More businesses - which means more people who are interested, willing, capable of creating businesses - which means educating children.

I feel like the current water project was poorly executed. The community it impacts wasn't asked for input or to vote if it would be wanted. We were essentially told that it is happening and we will be handed the bill in our taxes. It is admittedly concerning that our taxes can simply jump a thousand dollars or more without input from those affected. It is worrisome as someone who is thinking about those in our community on fixed incomes. Things like this can have big impact on those in the community and in this case feels like it is happening to us without us having had any real communication or chance to vote on interest before simply being told it was happening like it or not.

It seems that many of the projects are aimed for the Lakeside residents. I believe that they should be taxed accordingly, at a higher rate (as many towns do). Perhaps its time to look at the total tax picture in the Town.

25. How do you find out about most things going on in Kendall? Select all that apply.

Thank you for offering this survey!

Thank you for soliciting public input

Very little should be changed by government intervention.

Such change is never ever positive. The vision within the current Comprehensive Master Plan is still sound, and needs minimal updating.

Na

I cannot accurately answer many questions given we are seasonal

The bus appropriation should be transparent. How much diesel the state recompense the district and where does this money go?

General fund? Be transparent.

I love Kendall! Please stay small. I came from a larger town that may have had more to do but had major issues. That was why I choose Kendall to move to.

Thank you for the opportunity to participate.

Appreciate the opportunity to express concerns.

This town has enough rules and regulations that we have to live by. Get rid of the garbage ones that don't apply to 99% of us and and simplify the rest. Don't be a HOA. Be a TOWN.

Connect with key stakeholders

No STRs

Looks like you're looking for ways to spend more taxpayer money.

Leave things alone and look for ways to cut costs

We moved to Kendall because of its current charm and rural farming atmosphere, we would end up moving if it changes too much. No one needs another Greece or Henrietta

All in all, Kendall is a nice place to live. A small amount of industry, public wooded land, and nicer parks would be great. Also, please fix the roads. 18 west of the high school is terrible.

Kendall is a wonderful community of friendly. caring people.

Thank you to the team for working on this plan! I appreciate having the opportunity to participate in the survey and look forward to the outcome.

Great place to live. I've been here for a number of years and hope it doesn't more cityfied. The addition of Dollar General has helps with shopping and means that people spend their money in Kendall, not Bport or Hamlin. Keep it rural!

Wonderful community glad we put our retirement roots down here.
